IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

COMANCHE PUBLIC WORKS AUTHORITY DID NOT MEET MONITORING REQUIREMENTS

Our water system violated drinking water requirements pertaining to the contaminate(s) of concern listed below. Although none of these violations are considered emergencies, as our customers, you have a right to know what happened and what we are doing, or have done, to correct these violations. Customers are not at risk and there is no reason to suspect any potential adverse health effect. Alternative water supplies are not needed.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. During the following monitoring periods, we did not monitor or test for the following contaminants, and therefore cannot be sure of the quality of your drinking water during that time:

<u>Type of Sample(s)</u>	<u>Monitoring Period(s)</u>
CHLORITE	02/01/2023 TO 02/28/2023
CHLORITE	01/01/2023 TO 01/31/2023
TURBIDITY (MOR)	01/01/2023 TO 01/31/2023

WHAT SHOULD I DO? Nothing at this time

WHAT HAPPENED? WHAT IS BEING DONE? The chlorite sampling is a new testing requirement that became effective January 1, 2023. We now have this test documented with our other water monitoring tests.

WE HAVE RESOLVED THE PROBLEM as of March, 2023.

FOR MORE INFORMATION, please contact Chuck Ralls at (580) 439-8832 or 500 North Rodeo Drive, Comanche, OK 73529.

Chuck Ralls, City Manager
